

# Proposed Domestic Building Environmental Standards (Scotland) Bill

## Introduction

A proposal for a Bill to introduce new minimum environmental design standards for all new-build housing to meet the Passivhaus standard or a Scottish equivalent in order to improve energy efficiency and thermal performance.

The consultation runs from 4 May 2022 to 27 July 2022

All those wishing to respond to the consultation are strongly encouraged to enter their responses electronically through this survey. This makes collation of responses much simpler and quicker. However, the option also exists of sending in a separate response (in hard copy or by other electronic means such as e-mail), and details of how to do so are included in the member's consultation document.

Questions marked with an asterisk (\*) require an answer.

All responses must include a name and contact details. Names will only be published if you give us permission, and contact details are never published – but we may use them to contact you if there is a query about your response. If you do not include a name and/or contact details, we may have to disregard your response.

Please note that you must complete the survey in order for your response to be accepted. If you don't wish to complete the survey in a single session, you can choose "Save and Continue later" at any point. Whilst you have the option to skip particular questions, you must continue to the end of the survey and press "Submit" to have your response fully recorded.

Please ensure you have read the consultation document before responding to any of the questions that follow. In particular, you should read the information contained in the document about how your response will be handled. The consultation document is available [here](#):

I confirm that I have read and understood the Privacy Notice which explains how my personal data will be used.

## About you

Please choose whether you are responding as an individual or on behalf of an organisation.

Note: If you choose "individual" and consent to have the response published, it will appear under your own name. If you choose "on behalf of an organisation" and consent to have the response published, it will be published under the organisation's name.

on behalf of an organisation

Which of the following best describes you? (If you are a professional or academic, but not in a subject relevant to the consultation, please choose "Member of the public".)

*No Response*

Please select the category which best describes your organisation

Public sector body (Scottish/UK Government/Government agency, local authority, NDPB)

Please choose one of the following:

I am content for this response to be published and attributed to me or my organisation

Please provide your Full Name or the name of your organisation. (Only give the name of your organisation if you are submitting a response on its behalf).

(Note: the name will not be published if you have asked for the response to be anonymous or "not for publication". Otherwise this is the name that will be published with your response).

Torphins Community Council

Please provide details of a way in which we can contact you if there are queries regarding your response. Email is preferred but you can also provide a postal address or phone number.

We will not publish these details.

## **Aim and approach - Note: All answers to the questions in this section may be published (unless your response is "not for publication").**

Q1. Which of the following best expresses your view of the proposed Bill? Please note that this question is compulsory.

Partially opposed

### **Please explain the reasons for your response.**

As a practicing Architect and tutor of the Master's course at the local university, I work with the Scottish Building Regulations on a daily basis and also hope to sit the Passive Haus designers' course later this year. It is widely recognised that there is a climate crisis that needs to be addressed PDQ but also a housing and a cost-of-living crises. I would like to suggest you familiarise yourself with the various campaigns being taken by the professional bodies across the construction industry, namely the Royal Institute of British Architects (RIBA) Climate 2030 Challange. There is also substantial research being carried out by almost every academic institution that offers built-environment courses.

Regarding the Scottish Technical Buildings Standards, these have been updated several times in the past few years to increase the performance criteria of all new buildings, for example, Bronze, Silver, and Gold accreditation under Section 7 - Sustainability. You do not mention what changes are proposed, but I would be interested in what shortcomings you see in the current standards and how you would seek to improve on them.

The issue of a one size fits all scheme is that it disproportionately affects those less well-off and also people in more rural or remote areas. A Passive Haus in the central belt looks very different to a Passive Haus in the north of Scotland as the embodied and operational carbon required to keep it as warm is greater. Housing in the north of Scotland is already at a premium due to the difficulty of sourcing materials and trades. A blanket change to the standards risks new housing only being viable for the rich.

That's not to say we think the ambition is misplaced, but any uplift in the standards (and I believe there is

Q1. Which of the following best expresses your view of the proposed Bill? Please note that this question is compulsory.

still a lot of change needed!) has to be adjusted to regional and socioeconomic specifics.

I hope you take the time to consult with the various professional bodies, institutions, and our own building standards who appear to all be working in the same direction and could probably benefit from an interested MSP willing to work with them.

Q2. Do you think legislation is required, or are there other ways in which the proposed Bill's aims could be achieved more effectively? Please explain the reasons for your response.

See response

Q3. Which of the following best expresses your view on setting the Passivhaus standard or a Scottish equivalent as the most appropriate new build housing standards to contribute to eradicating fuel poverty?

Partially opposed

**Please explain the reasons for your response.**

I hope you take the time to consult with the various professional bodies, institutions, and our own building standards who appear to all be working in the same direction and could probably benefit from an interested MSP willing to work with them.

Q6. What could be the market effects of the introduction of this proposal?

See response

## Financial Implications

Q7. Any new law can have a financial impact which would affect individuals, businesses, the public sector, or others. What financial impact do you think this proposal could have if it became law?

a significant increase in costs

## Equalities

Q8. Any new law can have an impact on different individuals in society, for example as a result of their age, disability, gender re-assignment, marriage and civil partnership status, pregnancy and maternity, race, religion or belief, sex or sexual orientation.

What impact could this proposal have on particular people if it became law? If you do not have a view skip to next question.

Please explain the reasons for your answer and if there are any ways you think the proposal could avoid negative impacts on particular people.

see response

## Sustainability

Q9. Any new law can impact on work to protect and enhance the environment, achieve a sustainable economy, and create a strong, healthy, and just society for future generations.

Do you think the proposal could impact in any of these areas? If you do not have a view then skip to next question

Please explain the reasons for your answer, including what you think the impact of the proposal could be, and if there are any ways you think the proposal could avoid negative impacts?

*No Response*

## General

Q10. Do you have any other additional comments or suggestions on the proposed Bill (which have not already been covered in any of your responses to earlier questions)?

*No Response*
